

THE JUNGLE TREKKER 2

"The Simex Jungle Trekker 2, with its tough construction and aggressive tread design, has received rave reviews from the international 4x4 community and media outperforming its competitors in extreme weather conditions in some of the toughest terrains found around the world."

CHRIS HUMMER
Competition Manager
International 4x4 Rainforest Challenge

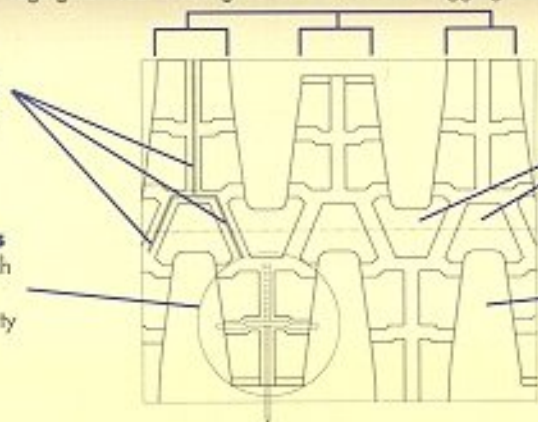

TYRE PATTERN

Y Shaped Lateral Grooves
This is the special design for maximum grip and traction on rocky surfaces and a secret "Weapon" for champion rock climbing in competitions.

Dagger Cut Independent Blocks
Free vibrating independent blocks which are divided by "Dagger" grooves provides maximum self cleaning property during tyre spin on soft soil.

Two Stage Lug
Special feature to enhance traction especially on soft soils. Alternate protruded lugs give wider tread groove area for mud digging and self cleaning.

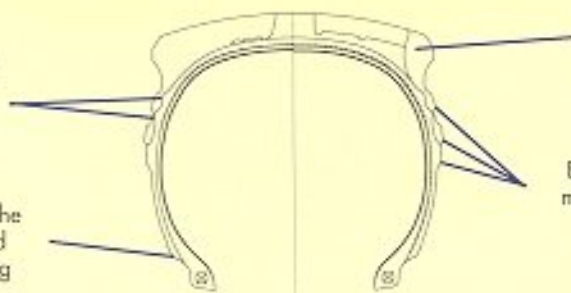

Centre Rib
Block arrangement to provide good handling on paved road.

Extra Deep Open U-Shaped Grooves
For maximum traction and self cleaning.

TYRE PROFILE

Double protective ribs at the buttress groove to fend off sharp objects from penetrating the rubber at the grooves

Rim Protector
To protect the rim from damage. However the main function is to support the lower bead region to minimise sidewall collapse during low pressure operation.

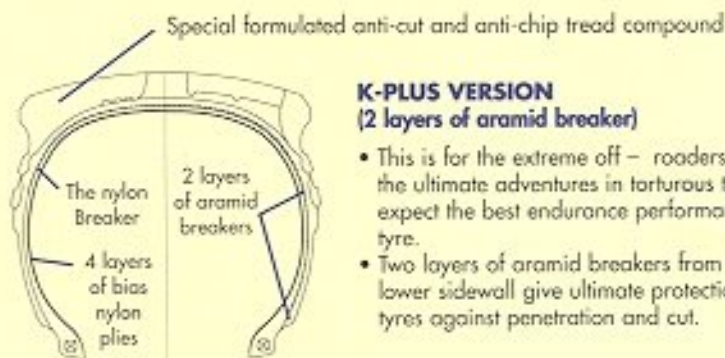

Massive protruded lug for:
• Extra traction in mud holes.
• Traction to lift the vehicle out from ditches and bog holes.

Extended protective ribs from the buttress to mid sidewall to protect the tyre from sidewall damage/penetration due to kerbing on rocks or sharp objects

TYRE CONSTRUCTION

STANDARD VERSION (with nylon Breaker)

- This standard version is for fellow adventurers who require toughness and traction in dirt and the rocky outlands.
- Made with nylon casing and breaker at tread and special formulated anti-cut and chip compound for protection against penetration and concussion.
- Strong sidewalls allow tyre to operate at very low pressure for maximum grip and floatation.

K-PLUS VERSION (2 layers of aramid breaker)

- This is for the extreme off-roaders who seek the ultimate adventures in torturous terrain and expect the best endurance performance of a tyre.
- Two layers of aramid breakers from crown to lower sidewall give ultimate protection of the tyres against penetration and cut.

Available In The Following Sizes:

34 X 10.5 - 15	6 PR	TT	TL	33 X 10.5 - 15	6 PR	TT	TL
34 X 10.5 - 16	6 PR	TT	TL	33 X 10.5 - 16	6 PR	TT	TL
34 X 11.5 - 15	6 PR	TT	TL	33 X 11.5 - 15	6 PR	TT	TL
34 X 11.5 - 16	6 PR	TT	TL	33 X 11.5 - 16	6 PR	TT	TL
